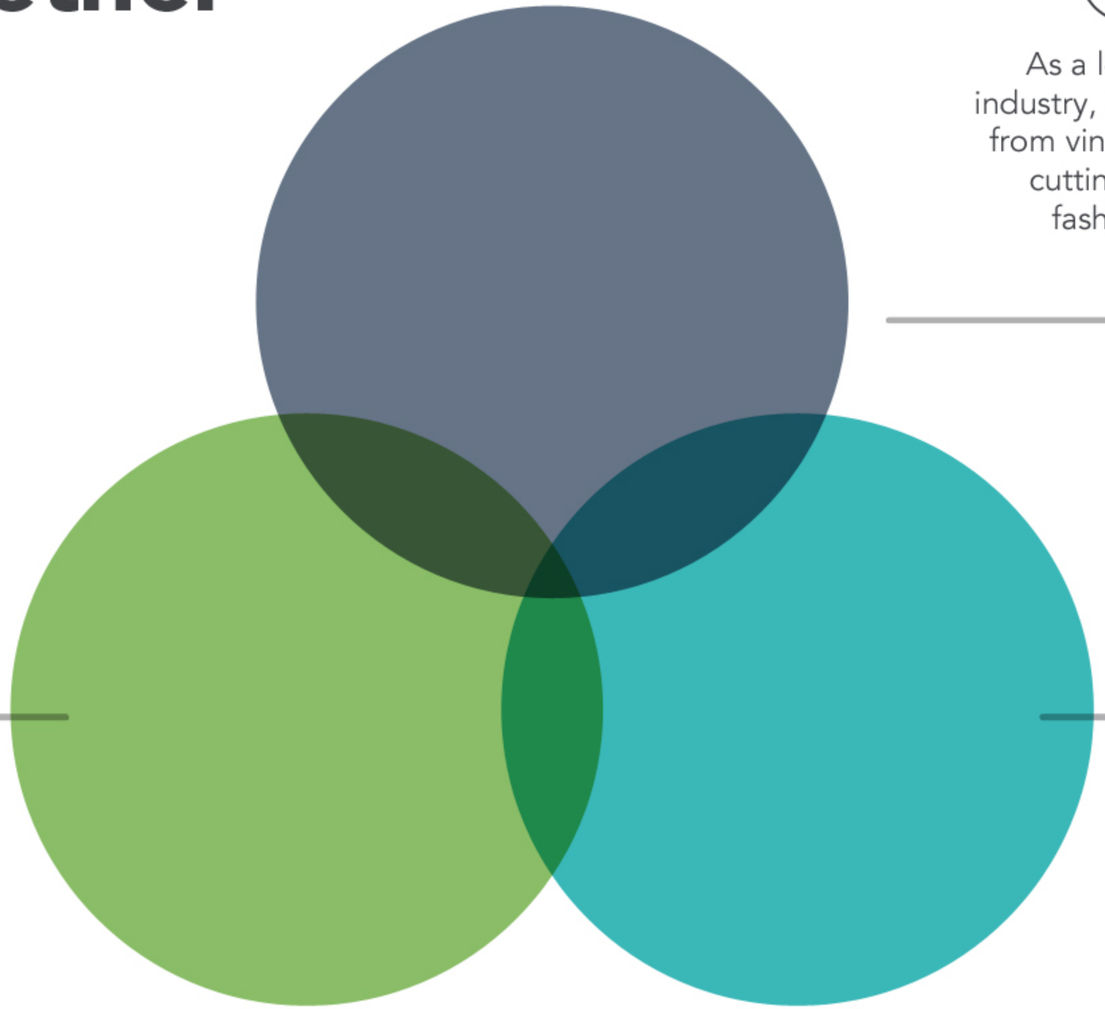
BARN LIGHT

ELECTRIC COMPANY®

working together works for us

BARN LIGHT
ELECTRIC COMPANY.

As a leading innovator in the lighting industry, Barn Light Electric takes inspiration from vintage designs, modern trends, and cutting-edge technology to produce fashionable, long-lasting lighting.



rep agency

From the initial design stage through the completion of the project, sales representatives assist their clients in their search for truly unique lighting.

end user

To stand out from the competition, businesses can create a unique commercial décor with Barn Light Electric's vast selection of lighting, furniture, and dinnerware.

meet the owners

2008

Motivated by their passion for vintage lights, owners Bryan and Donna Scott launched Barn Light Electric as a full-time operation.

2012

Thanks to Barn Light Electric, porcelain enamel lighting is manufactured in the United States for the first time in over 50 years.

2015

The company introduced a new commercial division focused on bringing fashionable, durable lighting to businesses throughout the world.

Meticulously engineered, fully customizable lighting, furniture, and accessories.

Designed with vintage-meets-modern principles.

Fully integrated with powerful LED technology for unprecedented efficiency.

Thousands of possible combinations with numerous styles, finishes, and customization options.

what sets Barn Light Electric apart

Fully Customizable,
Indescribably Stylish, Artisan Quality

Made in the USA

All of our products are crafted in our 50,000 square-foot, Florida-based manufacturing facility. Completing this process in the US gives us unrestricted control over the quality of the materials used in the construction of our lighting.

Hand-crafted

Beginning with flat pieces of solid metal — including steel, aluminum, brass, and copper — our lights are crafted, finished, and assembled entirely by hand! Constructed to the same high standards, our collections of furniture and dinnerware are also handmade.

Finish Options

Known for its durable, high-gloss properties, our signature porcelain enamel brilliantly conveys color and withstands installation in commercial settings. Unique powder coat colors and sophisticated copper and brass supply businesses with an eye-catching style.

Custom Capabilities

Whether you're dreaming of a bold new concept or need a special tweak on one of our established shades, our design specialists work with you to develop the perfect look for your space! Custom furniture designs can be created to your exact specifications.

the process

The Lathe

Spun at a high speed on a lathe, flat pieces of commercial grade metal are diligently manipulated and worked around a mold until the shade's classic shape emerges.

Oven-Fired Coating

In a 1600-degree oven, the porcelain is fused to the steel shade, forming a permanent bond between the two that offers a lifetime of protection.

the finishing touch

Porcelain

First used by historic lighting manufacturers, we've revived porcelain enamel for modern lighting. A porcelain enamel finish leaves shades with a heavy-duty feel, durable surface, and remarkable sheen.

Powdercoat

Ranging from vivid and playful to restrained and neutral, our vast assortment of powder coat finishes gives every space its perfect splash of color!

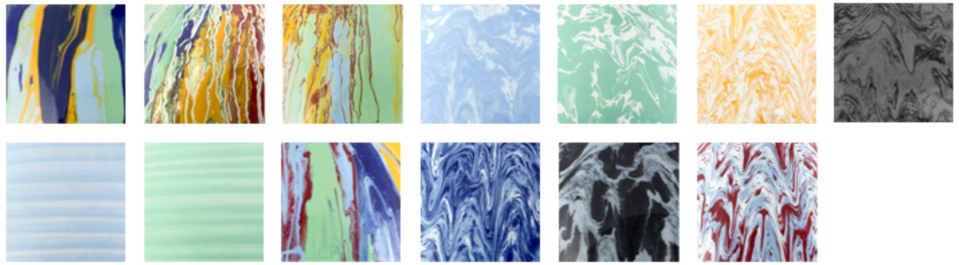
Copper & Brass

Displaying a simple natural elegance, copper and brass lights become instant statement pieces in any location.

specialty finishes

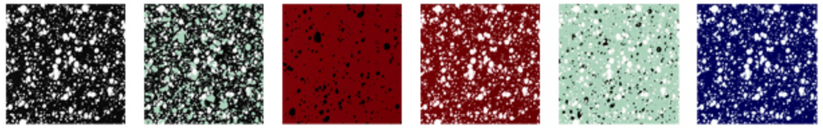
Pollock

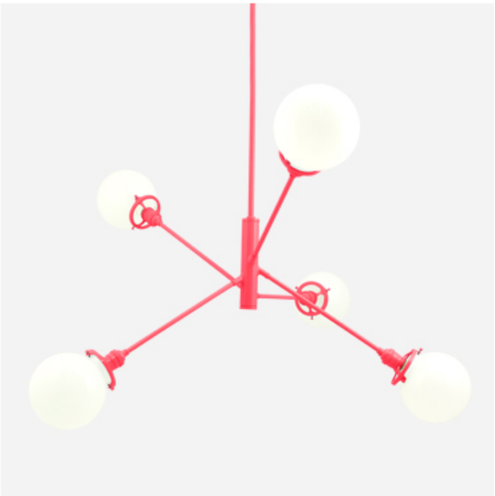
To create these colorful patterns, porcelain enamel is artfully dripped and spread across our shades. After a color is applied, the shade is fired in the porcelain oven. This process is repeated with each additional color until the pattern is complete!



Graniteware

With their nostalgic aesthetic, graniteware finishes imbue our lights with a timeless feel.



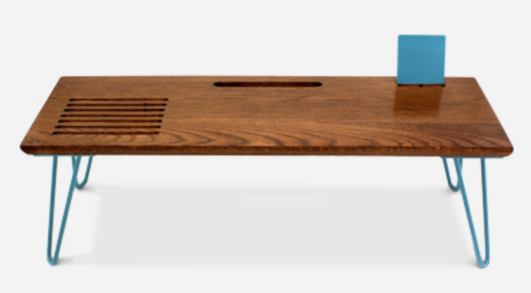


constant innovation

As trend setters, we're continuously exploring new technologies and the latest styles as we develop truly unique state-of-the-art fixtures.

unique industrial

In celebration of the latest styles, our imaginative industrial designs give contemporary spaces a fashionable rugged edge.



well furnished

From midcentury and modern to farmhouse and industrial, our collections of hand-crafted furniture help every space feel comfortable, inviting, and fashionable. With careful attention paid to the smaller details, our talented carpenters skillfully design and construct each piece of furniture entirely by hand.

delectable dishes

With vibrant patterns, bold colors, and classic designs, our collection of hand-crafted dinnerware gives every table a uniquely stylish aesthetic. Attentively crafted, each plate, bowl, and cup is handspun from quality metals for unparalleled durability.
