

# Powder Coat vs. Porcelain Enamel

From rich, dynamic hues to striking neutral tones, every space deserves the vibrant pops of color only lighting fixtures can provide. With three unique finish types available, our lighting can assume the perfect personality for any home or business.

## STANDARD POWDER COAT

You'll surely find your favorite color in our collection of standard powder coat finishes. This finish option features a slight but eye-catching sheen.

## MATTE POWDER COAT

Powder coat without the shine! Matte finishes bring an inimitable modern edge to our various lighting styles.

## PORCELAIN ENAMEL

Porcelain is unlike any other finish option. Not only is it high gloss, but it also provides an additional layer of protection to a shade.
