BARN LIGHT
ELECTRIC COMPANY®

Job Title: Senior Developer
Department: IT
Reports to: Chief Information Officer

Supervisory Responsibility: No
FLSA Status: Exempt
Physical Demands: Level I

Job Summary: Responsible working closely with IT, Junior Developers and Marketing by understanding and applying the principles of SEO, best practices for web development, mobile-first responsive design, business logic, application integration, e-commerce and CMS platforms, web developer tools, cross-browser and mobile compatibility, user experience and interface design, information security, web services (RESTful, SOAP, APIs), general Linux command line, MEAN stack, and LAMP stack (Linux, Apache, MySQL, PHP).

Essential Duties and Responsibilities:

- Responsible for design, implementation, and management of the overall architecture of web applications
- Work with business and technology teams to formulate specific application design (for Data Ingestion, Migration, Standardization and Analytical consumption needs)
- Integrate front-end coding and design with JavaScript, CSS3, compiled CSS LESS or SASS, and frontend libraries such as Bootstrap or MaterializeCSS
- Develop both mobile and desktop following industry standard best practices
- Maintain code integrity and organization
- Support CS-Cart and similar CMS architectures using Smarty templating engine
- Support back-end coding with PHP, and object-oriented programming
- Build REST & HTTP API services, starting from creating specs in RAML and interoperable in both XML and JSON
- Integrate server-side scripting with ShellScript/Bash, NodeJS or Python
- Understand and deploy security and data protection
- On-site is preferred, and may be required at our discretion, however remote is an option
- Completes applications development by coordinating requirements, schedules, and activities; contributing to team meetings; troubleshooting development and production problems across multiple environments and operating platforms
- Adhere to all company policies, procedures, and Standard Code of Conduct
- Maintain regular and prompt attendance
- Perform other duties as assigned

Required Skills

- Demonstrate understanding of HTML and HTML5
- Proficient in code versioning tool kits such as Git and Mercurial
- Experienced with API's and integrations
- Experience working with graphic designers and converting designs to visual elements, including the use of the Adobe Creative Suite
- Experience with MySQL, MariaDB, or other relational database management systems

- Proficient using advanced JavaScript libraries and frameworks including JQuery

Educational/Certification/License Requirements
- Bachelor's Degree in Computer Science, Information Systems, or related field or equivalent work experience

Please note this job description is not designed to cover or contain a comprehensive listing of activities, duties or responsibilities that are required of the employee for this job. Duties, responsibilities, and activities may change at any time with or without notice.
