

LED STEM & FLUSH MOUNT PENDANTS

REV 10.29.18

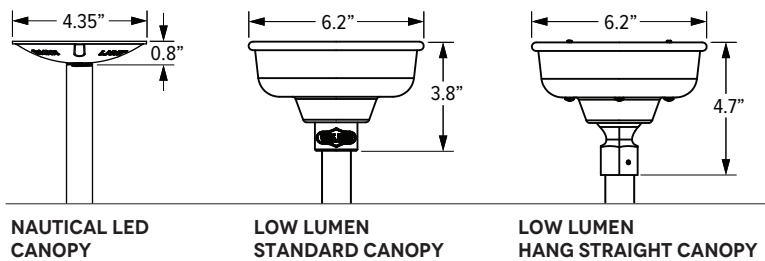

Coupling the durability of stem mountings with the efficiency and performance of LED technology, this assortment of pendants is among the most versatile options available. Hidden behind a sturdy stem, the fixture's wires and LED components are fully protected from the conditions they face in high-traffic areas and wet locations. The Flush Mounting secures the shade squarely against the ceiling, reducing the fixture's profile in tighter areas. A hang straight canopy suspends the stem mounting at its natural angle on ceilings sloped up to 30 degrees. Please Note: Standard LED Fixtures and Nautical LED Lights incorporate different canopies.
