4000 4000 K

B – SHADE & SHADE SIZE

All shades are constructed in our Titusville, Florida-based manufacturing facility. Beginning as a flat piece of metal, each shade is spun and carefully worked into its necessary shape. This entire process is completed by hand, giving our shades an unmatched quality and attention to detail. The edges are rolled, and the resulting shade is highly durable and stylish. 1100-0 Aluminum — ranging from 0.050" to 0.125" — is used for many shade styles. Our galvanized steel option is crafted from 20 Gauge Sheet Metal.

C - SHADE FINISH

Similar to the other stages in our manufacturing process, we apply the powder coat finish by hand. Ranging from bright and lively options to more subdued colors, there's a finish matching any space's needs. The powder coat is durable, able to withstand installation in outdoor settings and high-traffic commercial venues.

705 NAVY

800 INDUSTRIAL GREY

805 CHARCOAL GRANITE

975 GALVANIZED

Although raw copper and brass naturally exude elegance and warmth, several hand-applied finishes are available to further enhance these qualities. The "weathered" finish is offered to both metals, while an additional "oil-rubbed" option is extended to copper shades. Handspun from solid pieces of metal, these shades are constructed with a careful attention to detail.

NATURAL FINISHES
