

MADE AND SOURCED IN THE USA

Crafted and designed on Florida's
Space Coast.

At Barn Light Electric, we take pride in our commitment to lean manufacturing strategies and American craftsmanship. Our facility emphasizes efficient procedures and knowledgeable workers, with the majority of our materials sourced from American suppliers to support fellow domestic manufacturers. By bypassing overseas supply chains, we avoid time constraints faced by other lighting companies.

LOCALLY SOURCED

SUSTAINABLE In addition to our focus on quality and craftsmanship, we are dedicated to sustainability practices. All of our hardwoods come from North American suppliers with FSC certification, ensuring sustainable forestry practices. We make a point to highlight FSC-approved hardwoods in our wood fixtures specifications to underscore our commitment to sustainability.

LEAN MANUFACTURING

LOW FOOTPRINT We donate excess wood shavings to local farms for use as flooring material in chicken coops, and our powder coating processes are designed to minimize waste and support eco-friendly practices. Our metal waste is either repurposed into smaller items or sold to local recycling facilities, with revenue reinvested into our facility for continuous improvements.

UPCYCLED WASTE

REPURPOSED One of our sustainable practices includes crafting our Mig pendants using recycled acetylene tops, reducing waste, and contributing to a circular economy in our production process. At Barn Light Electric, we are dedicated to producing durable, long-lasting, and unique products while also supporting our local community and the environment. Crafted and designed on Florida's Space Coast, our commitment to sustainability is woven into every aspect of our operations.
